ABOUT ME

Occupation: Web Developer, Programmer, System's administrator and DBA.

Personal details: Born Komotini, Rhodopi Greece on November 20 1968.
Married, with no children.

SKILLS

System and Network Administration

Networking: WAN and LAN, set-up and maintenance experience using both Windows Server 200x and Linux. Red Hat EL and clones (CentOS, Oracle Linux), Debian/Ubuntu and SuSE (SLES). Desktop clients include Windows (Entire product line from NT4 to Windows 10) and Linux. (Red Hat, Debian based flavours and openSUSE).

Database Systems

Installation, administration, backup and recovery management in addition to SQL programming for the following databases. MySQL/MariaDB (on Linux), Oracle: 9i, 10g and 11g versions (on both Windows and Linux) and Microsoft SQL Server 2008 R2®.

Application Servers

Installation and administration of standard LAMP servers on RHEL and Debian and Oracle 10g application servers (OC4J and SOA Suite) on Oracle Linux.

ERP Systems Programming and Development

SAP-R3: Programming with ABAP, the system's native language. Experience in versions 4.6C and 6.0ECC. Additional experience in cross system coding allowing SAP to communicate with other systems using SAPJCo for Java, SAPRFC for PHP, the native SAPGUI ActiveX controls when programming with Delphi and C++ Builder and lately SOAP web services.

Web Development

- HTML, CSS, JavaScript, (jQuery)
- PHP (Experienced CakePHP developer (all version 1- 3).
- ASP.net using Microsoft MVC framework
- JSP and JSF programming using Oracle 10g ADF.

Desktop and Server Side Programming

Programming languages: Java, Embarcadero (ex Borland) Delphi, C++ Builder, Python, C/C++, JavaScript (with Node.js), bash scripting on Linux and C#. Additional programming expertise regarding the following systems: Android programming with Java, Arduino boards with C++ and Raspberry PI with Python.

Experience

Participated in projects regarding collection of real-time production data in the Thrace Group (Xanthi Greece and Charleston SC, USA). Similar projects collecting signal strength data are being implemented for Kfactor Ltd a UK based company working with BBC. Past experience include development of ComvosMail, a newsletter management and marketing tool for Sigmatics GmbH in Hannover, Germany, and 12 year carrier as a Senior Developer and System Administrator for Shelman SA. Finally I participated in a project for The Finance Management for Archaeological Projects (The Burial Tumulus of Mikri Doxipara -Zoni) that implemented cataloguing of all findings, maintenance actions and other activities of the Excavation of the Burial Tumulus of Mikri Doxipara-Zoni in Evros Greece and the 19th Ephorate of Prehistoric and Classical Antiquities where we implemented a CD, containing an electronic tour of the ancient city of Abdera and the surrounding archaeological site. Last I cooperated with the Municipal Water Supply and Sewerage Company of Komotini Greece for the development of an application to monitor support calls placed by customers and consulted on various Oracle related projects
